## Experience

---

### Econsul

May 2025 – Currently

Full-stack Developer (ReactJS + Laravel)

- Developed and optimized reusable components for the company's landing page, improving maintainability and performance.
- Built an internal dashboard integrated with HubSpot API, boosting employee's productivity.
- Developed a fee-tracking tool to help employees easily track user information and fill out their details.
- Implemented secure authentication for the dashboard with AWS Cognito and Google Auth.
- Built both Frontend (NextJS) and Backend (Laravel API) for Greencard.ge.
- Implemented Google and phone Auth for Greencard.ge.
- Added Internationalization for Greencard.ge using next-intl for frontend and Laravel Translatable for Backend.
- Hosted and configured backend on AWS EC2 Server with NGINX.
- Hosted frontend on AWS amplify to simplify (CI/CD) pipeline and save resources for backend.

### Redberry

November 2024 – March 2025

Full-stack Developer Intern (ReactJS + Laravel)

- Developed and optimized RESTful APIs in Laravel to handle frontend requests efficiently.
- Worked with Blade template engine to build Server-side app and email templates.
- Implemented Session based Auth with Laravel Sanctum.
- Collaborated with the team using Git and GitHub for version control and code reviews.
- Deployed applications to VPS production server by configuring Nginx, PHP-FPM and PM2.
