Bachelor of Information Technology   **2021– 2025**
Business and Technology University

Relevant Coursework:
- Front End Development
- Web Programming on ReactJS
- Programming with Python

Experience

JobHunters (2024) **-** job-hunters-30944.firebaseapp.com   /   GitHub
- Initiated, developed, and managed a full-stack web application using advanced technologies such as ReactJS, Typescript, Redux Toolkit, Firebase
- Used Redux Toolkit Thunks to separate asynchronous logic from synchronous.
- Utilized Firebase to safely authenticate users with email and password or with google account.
- Designed and implemented form validation using Formik and Yup, ensuring user input sanitization.
- Configured a CI/CD pipeline using Github Actions to enhance development operations.
- Deployed and hosted the project on Firebase

Unsplash-infinite-gallery (2024) **-** unsplash-infinite-gallery.netlify.app   /   GitHub
- Developed an infinite scroll gallery web application using technologies such as ReactJS and Tailwind CSS.
- Created a reusable custom hook for infinite scrolling.
- Implemented custom caching functionality utilizing session storage, to prevent redundant GET requests to the API.
- Users can view search history on history page. They can also click on the image to see more details and its stats in modal window.
